In a crowdfunding campaign, the money raised goes to the company/individual rather than to a bank account or personal funds. What is crowdfunding? crowdfunding - Defined crowdfunding - Refined crowdfunding - What? Crowdfunding is the use of the Internet to raise money for a new project. crowdfunding - Background The idea behind crowdfunding was born out of the desire for greater social interaction and the use of the internet to create connections and bring people together. Crowdfunding is the process of raising money for a new project or venture through a crowd of people or a crowdfunding platform. Some of the most recent crowdfunding campaigns have raised millions of dollars to develop new technologies or to fund a new idea. The term "crowdfunding" was coined in 2006 by Chris Williams, a software engineer at company, 37signals, to describe a new type of fundraising that could be used to fund new ideas and products. The term is derived from the expression "crowdsourcing." crowdfunding - How? In a crowdfunding campaign, the money raised goes to the company/individual rather than to a bank account or personal funds. This has two benefits: The money raised is limited to the amount that has been raised. The company or individual that is receiving the money can spend the money as they choose, without worrying about repayments or the need to earn interest. Crowdfunding is typically funded by the people who benefit from a new idea or product and want to help to make it happen. Crowdfunding platforms allow people to support a project or idea and then get a reward for their investment. Crowdfunding is a way for a project or company to obtain investment. Crowdfunding takes several forms, including different crowdfunding campaigns on different types of online platforms. Here are some of the most popular forms of crowdfunding:
